PROJECTS

Hekto – Full-Stack E-Commerce Web Application

- Built a full-stack e-commerce platform with React.js (Vite) frontend and Node.js/Express.js REST API
- Secured with JWT authentication and role-based access control (admin/user)
- Admin Dashboard to manage products, orders, banners, blogs, and categories
- Integrated Cloudinary for image uploads and MongoDB for data persistence
- Deployed on Render with cart, wishlist, checkout, and order history features.

Live: hekto-ecommerce-nepal.onrender.com 🔗

LinkMates – Real-Time Chat Application

- Developed a real-time chat system using Socket.io [↗](#) for user-based communication
- Created separate message rooms, live status updates, and real-time delivery tracking.

Interview AI — AI-Powered Career Preparation Platform

A full-stack web application that helps job seekers prepare smarter using Google Gemini AI.

- Users upload their CV (PDF) and provide a Job Description + About Self description
- Gemini AI generates a brand-new, improved and downloadable CV tailored to the job role
- Calculates ATS (Applicant Tracking System) friendliness score shown as a percentage
- Detects CV weaknesses and highlights missing or improvable sections
- Generates role-specific Technical & Soft Skill interview questions with suggested answers
- Provides a personalized 1-Week step-by-step interview preparation plan.
